

PRODUCT SPECIFICATION SHEET

Fusible Head Oil Fire Valve - 10mm / 3/8" BSP

BRAND:

FEATURES:

Connection
Size - 3/8"

MATERIAL:

3/8"

Product Description

'Handwheel Fire Valve' is another name for this fusible head valve.

This is a top-quality all-brass construction Fire Valve, which will isolate the downstream supply of oil should the handwheel be turned to the off position or should the heat from a fire melt the eutectic soldered link on the handwheel.

The valve features 3/8" BSP female threads, along with nuts and olives providing a 10mm compression inlet and outlet.

Features

- Connection size - 3/8" BSP - 10mm Compression
- Suitable for oil and kerosene
- Material - Brass
- Activation temperature - 72°C
